Nhat (Edward) Nguyen

North York, ON M3J 1A9 | (647) 571-6917 | ph.nguyen.dev@gmail.com | LinkedIn | GitHub | Portfolio

EDUCATION

Software Engineering Technology Advanced Diploma **September 2021 - April 2024**
Centennial College, Toronto, ON

- **Achievements & Awards:** Finalist in 12th Annual Technology Fair

TECHNICAL SKILLS

- **Languages:** Java, JavaScript (ES6+), TypeScript, SQL, C#
- **Frontend**: React.js, Next.js, Angular, HTML5, CSS3, MUI, Tailwind CSS
- **Backend:** Spring Boot, Node.js, Express.js, Flask, ASP.NET Core
- **Databases:** PostgreSQL, MongoDB, MySQL, DynamoDB
- **Cloud/DevOps:** AWS (Elastic Beanstalk, S3, DynamoDB), Docker, GitHub Actions, Jenkins
- **Testing:** Jest, JUnit, Mockito, Vitest, Postman
- **Tools:** Git, Jira, GitLab, REST APIs, CI/CD Pipelines, Agile/Scrum

PROJECTS

WanderNest – Travel Application | *Jan 2025 – May 2025* GitHub | Demo
Technologies Used: *HTML, CSS, Typescript, Next.js, Java, Spring Boot, PostgreSQL, Vitest, JUnit*

- Built a comprehensive travel planning platform, integrating authentication, itinerary management, and personalized recommendations systems that improved user travel planning efficiency**.**
- Engineered a responsive dashboard interface with React components for accommodation, dining, and activity recommendations, leveraging Google Places API to provide real-time data to users across **200+** global destinations.
- Engineered a budget management system with PostgreSQL database integration that allows users to track expenses across multiple categories, resulting in **35%** better budget adherence for platform users.

QQuizzes – Education Application | *Jan 2024 – Oct 2024* GitHub | Demo
Technologies Used: *HTML5, CSS3, Typescript, React.js, Node.js, Express.js, MongoDB, Vitest, Docker*

- Built a comprehensive quiz platform leveraging modern front-end and back-end technologies, offering features like quiz creation, sharing, playing, and dynamic leaderboards.
- Created responsive design to ensure optimal user experience across devices, with a focus on high-quality, maintainable code and robust testing.
- Optimized performance with React Query, reducing server requests by **50%** and increasing session duration by **20%**.

Book Finder – eCommerce Application | *Apr 2024 – May 2024* GitHub | Demo
Technologies Used: *HTML5, Typescript, React.js, Next.js, MUI, Tailwind CSS, PostgreSQL, Prisma, Stripe, Vitest*

- Built an online bookstore web application with key features such as comprehensive book listing, detailed book information pages and an admin control panel for book management.
- Designed fully responsive and accessible interface optimized for performance.
- Applied Test Driven Development (TDD) approach with unit testing and integration testing, increasing up to **90%** code coverage.

Bike Thief Prediction – Machine Learning Model | *Apr 2024 – Apr 2024* GitHub
Technologies Used: *TypeScript, React.js, MUI, Python, Flask, NumPy, Pandas, Matplotlib, Plotly*

- Led 5-person Agile team to deliver a predictive web tool with **90%** theft prediction accuracy.
- Bridged Python models (Logistic Regression, Random Forest) with frontend via Flask APIs.
- Documented all model parameters and code pipelines for reproducibility.

Movie Stream – Movie Streaming Application | *Aug 2023 – Sept 2023* GitHub | Demo
Technologies Used: *C#, ASP.NET Core, MVC, Bootstrap 5, DynamoDB, Amazon S3, AWS Elastic Beanstalk*

- Delivered full-stack streaming application with secure session-based authentication.
- Integrated Amazon S3 & DynamoDB with retry logic and error handling, increasing reliability by **30%**.
- Deployed scalable backend to AWS Elastic Beanstalk following DevOps best practices

WORK EXPERIENCE

Front of House Staff – New York Fires, Toronto ON **October 2024 - Present**

- Delivered high-quality customer service in fast-paced environment.
- Managed multiple priorities under pressure.
- Developed strong communication and teamwork skills.
